NO MORE BLIND SPOTS IN YOUR CONTRACTS

## GET A GRIP ON YOUR MILESTONES, TERMS, AND OBLIGATIONS

YOU WILL GAIN

- Real-time insight into your contracts

- Lower management costs

- Zero manual work and a more efficient legal department

- No more siloing and conflicting contract versions

- Perfect compliance and reduced legal and commercial risk

- Improved supplier relationships and a more robust supply chain

DXCONTRACT

The contract is an invaluable tool for both you and your partners. It allows your business to buy, sell, rent, or pay – in other words, to grow. But contracts are also a liability. They are paper documents with multiple versions and terms. They're prone to errors, breaches, and legal issues.

DxContract is a contract management tool that brings you and your partners on a single platform. DxContract solves all paper-generated issues, while also boosting your profits. How? Thorough standard P2P and O2C integrations. This means that any contractual term can be tracked in your and your partners' operational processes such as purchasing or invoicing. It prevents any error in operations stemming from siloed, paper-based contracts that lie in a drawer.

PRODUCT FEATURES

- Direct integration with our invoice, order, logistics, and catalog products. This allows you to track contractual terms (prices, discounts, promotions, matching, deliveries etc.) in day to day operations.

- Legal templates that allow versioning and contract duplication, as well as improved controlling.

- Customizable approval flows depending on your specific business needs.

- Granular user permissions, depending on user roles and groups.

- Audit trails that can not be altered, even after a contract's cancellation.

- A smart search system that's based on metadata, which allows free search within contract text.

- Notifications and alerts, warning you of contract tasks, milestones and renewals.

- Compliant electronic signature, for extra document security.

- Out-of-the-box integration with well-known productivity suites such as Microsoft Office and Business IS.
