THE PERFECT INVOICE EVERY TIME

EMPOWER YOUR AP PROCESS THROUGH
AUTOMATION

YOU WILL GAIN

- No manual work and an exponential increase in efficiency
- The complete elimination of invoice errors
- Perfect legal compliance and security
- Continuous, real-time accounting
- 360° visibility into your cashflow, including all owed, due, and paid sums
- 100% onboarded suppliers, managed by our team

DXINVOICE

From creation to the moment they reach the ERP, invoices have a long road ahead of them. They have to be written, checked for errors, printed, sent, validated, and matched. And the most difficult part? This is all on your and your partners' time and expenses!

By using DxInvoice, you gain an elegant and 100% automated solution to this issue. With it, aside from compliant and error-free e-invoicing, you will also gain 360° visibility into your AP process. Furthermore, by integrating it with our other products, you will speed up transactions across your entire ecosystem. So, are you still searching through your mail for that invoice?

PRODUCT FEATURES

- Native integration with our orders, logistics, e-catalog, and contract management solutions. You'll be able to check invoices against contract terms, but also against mutually agreed product data.
- Full support for merchandise, services, CAPEX, return, and self-billed invoices, as well as auxiliary documents.
- Advanced matching and validation, according to your business rules.
- Real-time enrichments that will make sure invoices are accepted by both you and your partners' systems.
- The ability to tackle both unstructured and structured formats, as well as paper documents (through integration with our managed dematerialization service).
- Visibility into the e-invoicing process across your entire business ecosystem. Both you and your partners will know when the invoice was created, sent, or approved.
- Customizable workflows, depending on your company's structure, but also on the needs and capabilities of your partners.
- Customizable user access, with as many users and departments as necessary. No extra charge!
- Out of the box compatibility with over 200 ERPs so neither you or your suppliers won't have to change a thing in your infrastructure.
