# GET RID OF PROCUREMENT WEAK LINKS

BOOST YOUR P2P PERFORMANCE WITH  
E-ORDERS

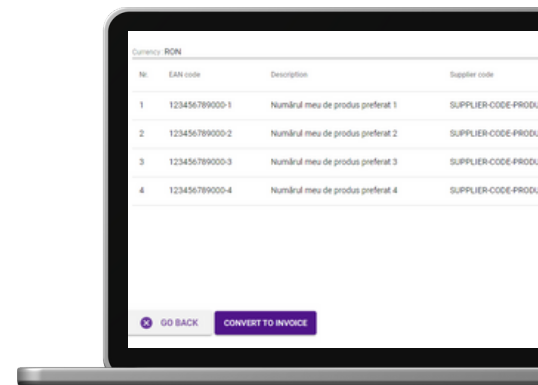

## YOU WILL GAIN

- Decreased overhead in your procurement department
- Increased efficiency, with fully accurate electronic POs
- Improved spend management
- Improved partner and stakeholder relationships
- A stronger supply chain: you always get what you ordered.
- 100% supplier onboarding, as a managed service

## DXORDER

Did you know that most companies are unsatisfied with their ordering process? Did you also know [only 23%](#) use e-orders, the rest relying on manual work, text documents and phone calls? It goes without saying that these two issues are connected.

With DxOrder, you get an end-to-end order management solution, integrated with both your and your suppliers' systems. Yet speed is nothing without accuracy. This is why DxOrder generates orders that are 100% faithful to product data and contract terms. And the best part? Neither you or your partners have to change anything. Our solution is compatible out-of-the-box with your ERP systems.

## PRODUCT FEATURES

- End-to-end automated order management for procurement.
- Complete integration with our product suite. This allows you to automatically match orders to contract terms or generate logistics documents. Thus, the supply chain will be optimized both downstream and upstream.
- Out of the box compatibility with over 200 ERPs which means you won't have to make any changes to your infrastructure.
- Customizable flows for order confirmation and negotiation that will ensure you get exactly the products or services you ordered.
- Advanced matching with invoices and advices, depending on your business flow.
- Status messages and notifications, keeping all parties in the loop.
- Order conversion into invoices and other documents.
