- If you are already using our DxArchive module, you can enjoy the new enhanced interface in no time
- Improved workflows through better collaboration and information sharing inside your organization

DXARCHIVE PLUS

When you need to reduce your data storage costs and also improve security, electronic document archiving is a must.

DxArchive Plus is our electronic archiving solution especially created for storing any type of document, expanding beyond standard transactional documents. Our e-archive allows you to download and upload content from/to specific applications, whenever and from wherever you are, in a content repository that is common to your entire company.

In an environment where data security and processing are of utmost importance, we digitise and store your documents in total compliance (traceable, unaltered and permanent) from capture until their electronic archiving with probative value.

PRODUCT FEATURES

- An easy to manage and deploy solution, that requires no changes in your IT infrastructure.
- Fully compliant audit trails. DxArchive Plus tracks every process and activity in real-time, offering you legal proof for auditing.
- Always-on content. DxArchive Plus can be accessed from anywhere and supports a wide range of formats.
- High capacity. You can manage very large volumes of digital archives under optimal security and durability conditions.
- Reversibility. Seamless integration with 3rd party systems, both for storing documents and for retrieving them.
- Interoperability. Archive documents using an automated flow, directly from your system of choice (ERP, CRM or even custom company tools).
- Customization. A powerful rule engine, adaptable to your specific business needs and document workflows.
- Granular permission management, allowing you to manage access based on users, roles, or teams.
- Guaranteed compliance with local and European policies and legislation.
